WORLD COMPETITION RULES

THE COMPETITION IS OPEN TO WOOD SCULPTORS OF ANY LEVEL OF ARTISTIC SKILL. IN ADDITION TO WORLD AND MASTERS, THERE ARE THREE GENERAL LEVELS OF COMPETITION: ADVANCED, INTERMEDIATE AND NOVICE.

Competition Levels

Carvings are grouped together by levels indicated by colored banners hanging over the display areas.

• **World (white banners):** In the six World Divisions, entrants compete for the title of World Champion, championship ring and cash award.

• **Masters (turquoise banners):** Only carvers who have previously won two Best of Show awards in Advanced, or placed 1st, 2nd or 3rd in World in any division other than SR Shootin' Rig are eligible to enter in Masters and are no longer eligible to enter Advanced. They are eligible to enter any of the four divisions of the Masters Class competition and/ or they may elect to compete for a World title. This applies to either an individual carver or a carver in partnership with another artist. If it is discovered that a carver has entered Masters without meeting the eligibility requirement, the entry will be immediately removed from the Masters area. If judging has already occurred, any awards will be rescinded.

• **Advanced (blue banners):** This level represents advanced amateur and professional carvers, including those who have obtained top rankings in competitions. Entrants compete for cash awards, ribbons, and rosettes. Advanced is not open to MASTER carvers. Any carver who is not eligible for Masters but has entered at the World Level must enter Advanced.

• **Intermediate (yellow banners):** This level includes carvers who have refined their sculpture and painting skills beyond the novice level. Intermediate carvers compete for ribbons, rosettes, and Best in Show cash awards. Carvers who have won one Best in Show or two Best in Division (excluding Bench) awards at this level in the World Competition must move to the Advanced level. Carvers who have been consistent blue ribbon winners at this level are encouraged to move up to Advanced.

• **Novice (red banners):** This level is reserved for entry-level carvers. Novice carvers compete for ribbons, rosettes and Best in Show cash awards. Carvers who have won one Best in Show or two Best in Division (excluding Bench) awards at this level in the World Competition must move to the Intermediate level. Carvers who have been consistent blue ribbon winners at this level are encouraged to move up to Intermediate.

Judging Criteria

The following definitions of judging criteria have been adopted by the Ward Foundation. Each criteria is given equal weight in the judging process. The higher the level the more critically assessed. These criteria will be used for all of the following levels of competition—World, Masters, Advanced, Intermediate, and Novice—in all divisions except Interpretive:

• **Technique/Craftsmanship** refers to the technical skills involved in bird carving: sculpting, painting and finishing techniques and their execution. It covers the bird or birds, any habitat or accessories that may be involved and the base itself if there is one. Craftsmanship should be consistent throughout the entire piece. Good craftsmanship is basic to bird carving. Without it, a piece will go no further.

• **Accuracy** involves the correctness of a piece from a scientific perspective. Is the bird the right size? Are the feathers the right shape? Is the coloration and pattern correct? Are the eyes properly placed? Do the toes have the right number of joints and are they in the right places? All these are questions of accuracy. Anything accompanying the bird must be given the same scrutiny. Accuracy involves the natural history of the whole piece, all of its components and the appropriateness of these components together.

• **Essence of the Species** involves taking accuracy one step further. It involves a thorough knowledge of one's subject and the ability to capture an attitude in wood. You see a bird on your lawn at dusk. You can't see any details in the failing light, just a silhouette, and yet the hop and cock of the head immediately identify it as a robin. The essence of the bird is there without a feather count, a measurement of length or a check on color. You may have flawlessly crafted your bird with faultless accuracy, but unless you have captured the essence of your subject and given it the spark that brings it alive, your bird will not achieve its fullest potential.

• **Artistry** of a piece involves its design and composition. This is where presentation, innovation and creativity all come into play. There should be a beauty in the concept apart from the beauty of the bird itself. Line, form, content, color, mass and movement should all be working together to create an integrated whole. Of all the concerns in carving, artistry is the most elusive, the most difficult to explain, to teach, to analyze in the work of others, and to instill in one's own work. But the difficulty is an indication of the importance.

WORLD COMPETITION RULES

THE COMPETITION IS OPEN TO WOOD SCULPTORS OF ANY LEVEL OF ARTISTIC SKILL. IN ADDITION TO WORLD AND MASTERS, THERE ARE THREE GENERAL LEVELS OF COMPETITION: ADVANCED, INTERMEDIATE AND NOVICE.

Judging Criteria

• Overall Presentation. What is rare is often what is valuable. Bird carving requires a multitude of technical skills brought together in the overall presentation. Additionally, it requires a thorough knowledge and understanding of birds scientifically as well as emotionally. But most importantly, it involves the ability to bring all these elements together artistically. If bird carving is to move beyond craft to art, our goals and expectations must do the same. No artificial lighting will be used during judging, artificial lights (handheld or tabletop) are not permitted and will not be on the display.

• All criteria are important. They all overlap and build on each other. In order for a piece to reach its fullest potential it must succeed in all five areas simultaneously. For the sake of clarity we have dealt with them individually, but in reality the distinctions are not so clear cut.

As the competitor moves through the different levels of competition and eventually to the Masters and Advanced levels, technique/craftsmanship and accuracy as criteria are taken almost for granted, as these are the tools expected to have been mastered, allowing the artist to concentrate on the essence of the species and artistry of the competition piece entered. Please refrain from posting images of your work in progress to finished carving of your entry pieces on social media.

Some rules are open to individual interpretation, giving an artist as much artistic license as possible; some are very specific. It is up to the judges to interpret the rules with guidance from the Ward Foundation. The judges' decisions are final.

DECORATIVE MINIATURE MEASURING CRITERIA
Entries must be one half lifesize or less. The Ward Foundation reserves the right to move entries deemed too large for miniature to the bench class.

WATERFOWL PAIR

Unless otherwise stated, a waterfowl pair is a drake and a hen of the same species.

Judging Criteria

RULES FOR BEST IN CATEGORY AND DIVISION AWARDS

• First, Second and Third in Category winners (Division E, CD, GP, SW and YG) will be determined with First in Category being selected from the First in Species winners. Second in Category will be chosen from the remaining First in Species winners along with the Second in Species of the previously selected species. Third in Category will be chosen from the remaining First in Species winners plus the next runner-up at the species level in the species previously selected for First and Second in Category. In other words, it is possible to select First, Second, and Third in Category from the same species.

• Best in Division (All Divisions except World's, MH & H) will be selected from the winner of each of the Categories. Second in Division will be selected from the remaining First in Category winners plus the Second in Category winner from the previously chosen Category. Third in Division will be chosen from the remaining First in category winner(s) and the next runner-up at the Category level in the category(ies) previously selected for First and Second Division. In other words, it is possible for judges to select First, Second, and Third in Division from one species.

• Division MH & H will be judged for Best in Division with second and third awarded as well.

Competitors must submit documented reference materials at the time of registration for those birds not listed in the National Audubon Society's The Sibley Guide to Birds. These reference materials are necessary for the accurate judging of your bird. The Ward Foundation is not responsible for lost reference materials.

WARD WORLD CHAMPIONSHIP

An Observation a poem by J.B. Garton

There are Winners and Losers and Judges,
the people of moderate fame!
No utter the possible outcome,
we're all involved in the game.
Now, some of us struggle with Contests
the essence of efforts and such,
No matter how much we struggle,
"The Efforts", they don't come too much.
Then out of the Woods comes a Carver
with a most original work,
He'll humbly submit it for judgment,
not knowing he's in for a jerk!
The Contest has got to be Biased!
The situation is not going well,
The judges are all slightly Balmy
By the pieces they pick; "You can tell!"
The crowd is completely dumbfounded
the awards have been placed, "You can see!"
The ribbons they've placed on the winners
Have certainly skipped you and me!
No matter the facts or the outcome
each time it's always the same;
for conditions, Decisions, and Visions
The judges are always to blame!
As long as there's Contests to ponder
to study some beauty of work,
As long as we need a decision
There remains this one simple quirk.
We need an indifferent decider
A person without any grudge,
They call that poor soul to the forefront
And tell him that he is the Judge!
We try to be honest and humble
But really, there's only one test,
No matter which way you cut it
The best are always the best

2024 WORLD COMPETITION CHAMPION LEVEL

Division SR–Shootin’ Rig

These decoys are rooted in the classic gunning decoys’ function and design. As a World Class division, they are judged on Technique/Craftsmanship, Accuracy, Artistry, Overall Presentation and Proper Floatation. Judging is a two-part process. It begins on the table where they are judged in hand and reviewed for compliance of the rules. Final judging is done while the entries are floating on Assawoman Bay at a minimal distance of 20 feet. Judges remain on the judge’s platform until the judging is completed. Decoys once set remain at anchor for the duration of judging.

1. Any worldwide species of waterfowl, including pelagic and coastal seabirds, may be selected. All seasonal plumages are acceptable.
2. Three birds are required: a drake and hen of the same species with a third bird of choice.
3. Decoys shall be floated as a rig and they must self right. Anchor lines with a maximum length of 6 to 8 feet will be attached to each rig component. Sufficient weights are required.
4. Decoys will be judged under natural weather conditions in Assawoman Bay and demonstrate proper floatation.
5. Decoys shall be constructed of wood or cork; glass eyes are permitted. All vulnerable areas must be durable; materials other than wood can be used in tails and crests. During registration, carvers have the option to submit in writing any structural strengthening techniques used in their rig. This information will be identified by carver’s number and given to the judges during their initial evaluation.
6. No burning or fine stoned texturing is allowed. However, simulated texture using gesso, modeling paste, or texture paint in combination with combing, scratching, or brushing is acceptable. Minimal carving techniques used to simulate feather texture on heads, i.e. merganser heads, are acceptable.
7. Any deterioration of the paint or structural integrity at the completion of judging will result in the disqualification of the entry.

Division WG – Single Gunner Decoy

The 2024 species is a Ring-Necked Duck (Drake). This division emphasizes simplicity and most resembles the functional tool of the decoy maker. Entries will be reviewed for compliance with rules prior to judging. Decoys will be judged 20 feet from the judges on Assawoman Bay (weather dependent).

1. Carving and painting should be functional enough to be used as tools for hunting. No undercut feathers. Wood, cork and canvas allowed.
2. Decoys will be floated and must self-right from any position, except geese, swan and confidence, which must right only from their side(s). All entries will be judged for stability and proper floatation.
3. Carvings must be a drake of said species. They should be lifesize or oversized with no preference shown by judges.
4. No burning or fine-stoned texturing is allowed. However, simulated texture using gesso, modeling paste or texture paint in combination with combing, scratching or brushing is acceptable. Minimal carving techniques used to simulate feather texture on heads, i.e. merganser heads, are acceptable.
5. Painting: Can be simple in style, or in the style of a contemporary antique with no preference shown by judges.
6. Any deterioration of paint or structural integrity at the completion of judging will result in the disqualification of the entry.

DIVISION CI - CHAMPAGNE INTERPRETIVE

Entries will be judged on artistry, interpretation of the essence of the wildfowl, and originality. A carving should emphasize form, content, and movement rather than a realistic duplication of the wildfowl. It should be presented in a style that provokes thought and wonder. Natural finish ONLY.

1. Entries must fit within a 3 1/2-inch circle, this includes the base.
2. Subject may be entrant's choice from any wildfowl.
3. Entry is to be entirely of wood with the exception of the structural elements. The base may be of other materials and will be considered as part of the sculpture. There must be no or minimal assembly required when the carving arrives at the museum for staff to assemble.
4. If a supporting pedestal under the base is needed, it must be provided by the artist and it will not be considered part of the sculpture. If included, it must require only simple assembly, and instructions must be provided. Must also fit in the 3 1/2 inch circle/cylinder (Height limit of 7 inches tall).
